

Proving Infrastructure Update

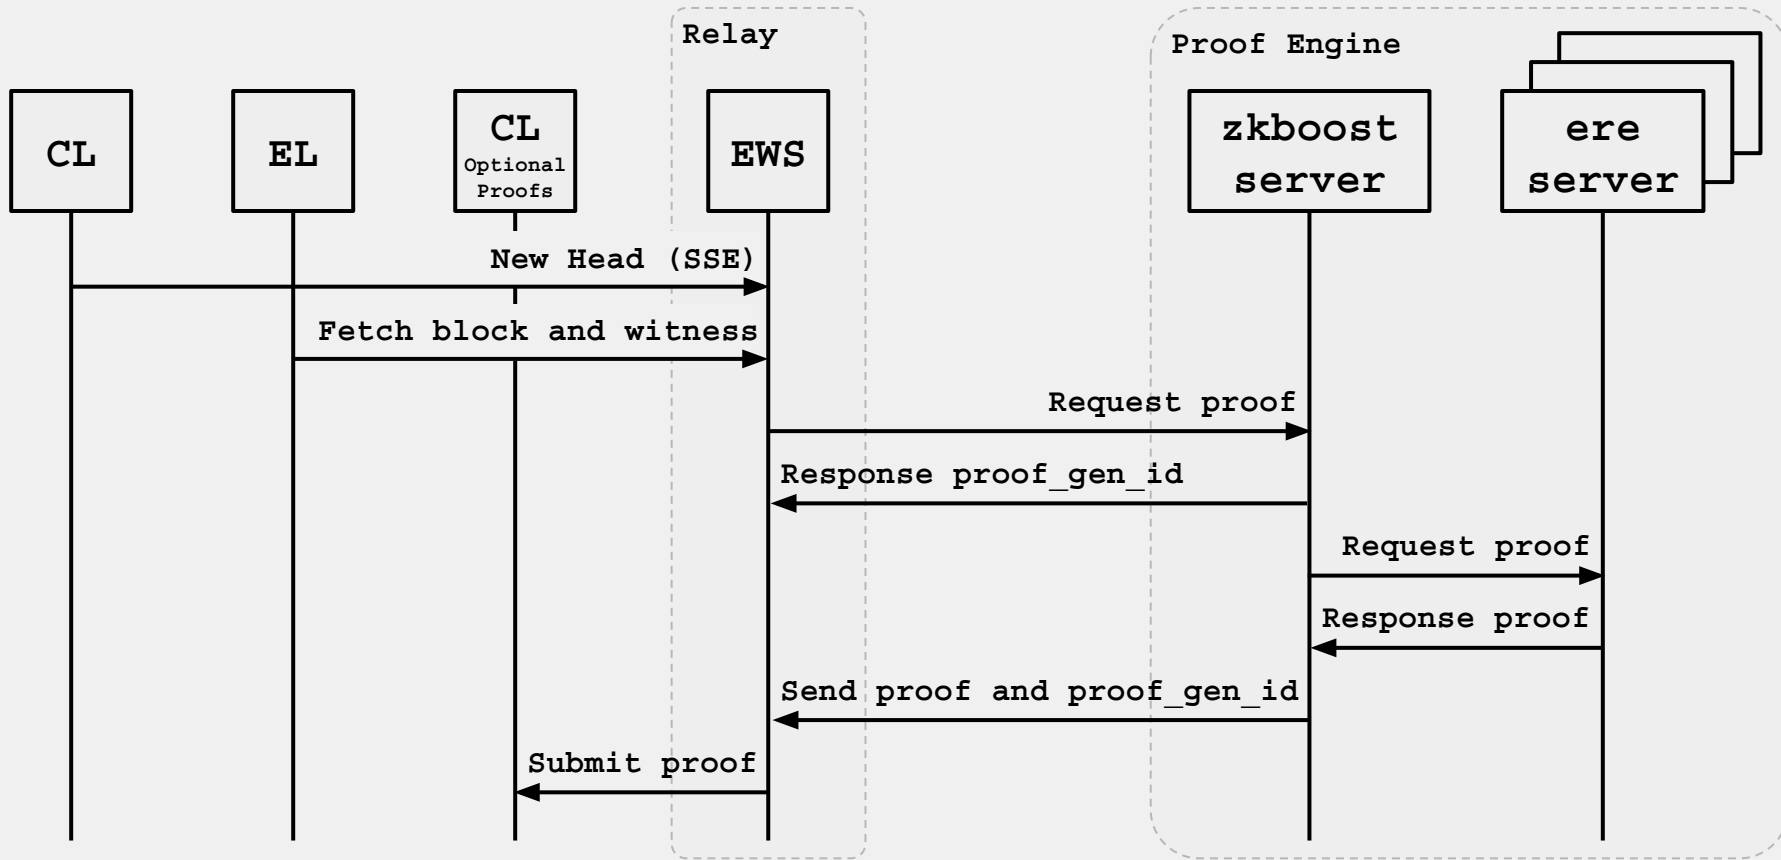

Milestones

- Integrate zkVMs into Ethproofs
- Ensure GPU implementations are open source
- Integrate zkVMs into Ere
- Test zkboost in isolation with a single and then multiple GPUs
- Metrics to track prover reliability and pipelining inefficiencies
- Allow attesters to use this infrastructure to verify proofs

Overview

E2E

[Local testnet e2e example](#)

Integrated zkVMs

	Single GPU	Mutli GPUs	Cluster
Airbender	V	V	
Jolt			
Nexus			
OpenVM	V		
Pico			
RISC Zero	V	V	TODO
SP1	V		<u>BSL</u>
Ziren			
ZisK	V	V	V

Available EL guest programs

	Ethrex	Reth
Airbender		TODO
Jolt		
Nexus		
OpenVM	TODO	V
Pico		V
RISC Zero	V	V
SP1	V	V
Ziren		
ZisK	V	V

Next steps

- Fully integrate into [ethpandaops/ethereum-package](#)
- Clean up to follow [EIP-8025](#) spec/naming
- Add more metrics to track the pipeline efficiency
