

Optional Proofs — Progress Update

Breakout Call, May 13, 2026

Francesco Risitano

Updates

- **EIP-8025 rewrite** – [PR #11604](#)
- **General CL-specs refactor merged** (proof node API, dynamic proof-type advertisement) – [PR #5055](#)
- **MAX_PROOF_SIZE** bumped to 400 KiB – [PR #5162](#)
- **Validator proof re-signing deprecated** – design captured in [HackMD](#)
- **Optional execution & proof engines via optimistic sync specs** – [PR #5161](#)
- **Beacon-APIs endpoints updated** for EIP-8025 – [PR #569](#)
- **Opt-in witness retrieval flag** on existing engine methods – [execution-apis proposal](#)
- **Proof-type encoding discussion** – [eth-act/execution-proofs-api#1](#)
- **Network proof gossip writeup** for EIP-8025 – [HackMD](#)
- **GPU `ere` prover support landed** in ethereum-package (GPU driver / config spec, `shm-size` + ulimits) – [PR #1353](#)
- **Lighthouse ↔ Prysm interop devnet** ran successfully
- **Lighthouse**: maintainer-facing architecture writeup for the EIP-8025 implementation – [HackMD](#)
- **Lighthouse**: validator re-signing deprecated to align with the spec change
